

HARSHIT PAL

Full-Stack Developer | B.Tech CSE, KIET Ghaziabad (2025–29)

harshit.pal.8.d.sdpsmzn@gmail.com | github.com/harshit-siraswal | linkedin.com/in/harshit-siraswal | Ghaziabad, India

SUMMARY

First-year B.Tech CSE student at KIET Ghaziabad with a strong record of independently building and deploying production-grade full-stack applications. Experienced across React/Next.js frontends, Node.js/NestJS backends, PostgreSQL databases, and Flutter mobile apps. Shipped 3 live products; comfortable with AI/LLM integration, WhatsApp automation, Docker, and cloud deployment pipelines.

PROJECTS

StudyShare Platform

studyshare.in (Live)

Tech: Next.js, TypeScript, Node.js, PostgreSQL, Flutter, Redis, Docker, n8n, PyMuPDF, Tesseract OCR

- Built full product suite: Next.js web app, Flutter mobile app, REST backend, WhatsApp automation bot, and admin dashboard.
- Engineered WhatsApp ingestion pipeline with PDF/OCR extraction, LLM fallback classification, confidence-gated auto-posting, and idempotent retry logic.
- Deployed on Railway + Neon serverless Postgres; Android APK available for download from the website.

Code Analyser

github.com/harshit-siraswal/code_analyser

Tech: React 18, TypeScript, Monaco Editor, Node.js, Prisma, Python FastAPI, Judge0 API, PostgreSQL

- Coding practice platform that analyses HOW users solve problems — not just pass/fail outcomes.
- Monaco Editor + Judge0 sandbox for in-browser execution; AST parsing detects concepts, diffs attempts, classifies errors, estimates time complexity.
- Zero-cost deployment: Vercel + Railway + Neon Postgres + RapidAPI Judge0.

BuildSmart

buildsmart-kohl.vercel.app (Live)

Tech: TypeScript, React, Node.js, LLM/AI Integration

- AI-powered build management tool — designed, built, and shipped end-to-end in under 2 weeks.
- Integrates LLM capabilities for intelligent build recommendations and automated project insights.

Manhole Presence Detector — IoT Mesh System

Hardware Project

Tech: ESP32, HX711 Load Cell Amplifier, Ultrasonic Sensor, ESP-NOW Mesh Protocol, MQTT, Node.js

- Built an IoT device using ESP32 + HX711 + sensors to detect manhole cover presence/absence in real time.
- Implemented a mesh network via ESP-NOW protocol — devices relay status to each other with zero internet or GSM dependency.
- Gateway node pushes live manhole status to a municipality dashboard, enabling rapid response to uncovered manholes.

EDUCATION

B.Tech – Computer Science & Engineering KIET Ghaziabad	2025 – 2029 (Pursuing)	CGPA: 7.83 (Sem 1)
Class XII (PCM) SD Public School, Muzaffarnagar	2025	81.2%
Class X SD Public School, Muzaffarnagar	2023	94.6%
JEE Main 2025 — 89.12 Percentile		

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, Dart, HTML5, CSS3
Frontend:	React, Next.js, TailwindCSS, shadcn-ui, Vite, Flutter
Backend:	Node.js, Express, NestJS, Python FastAPI
Databases & Cache:	PostgreSQL, Neon (Serverless), Redis
DevOps & Tools:	Docker, Vercel, Railway, Git, GitHub, n8n, Prisma ORM
Specialisations:	LLM/AI Integration, WhatsApp API, OCR (Tesseract), AST Parsing, JWT Auth, CI/CD

ACHIEVEMENTS

- 3 live deployed applications (StudyShare, BuildSmart, Studyspace) with real users.
- 12+ full-stack projects built independently; 19 public/private GitHub repositories.
- Integrated complex third-party APIs: WhatsApp (OpenClaw), code execution (Judge0), LLMs (Gemini/GPT).
- End-to-end product ownership — architecture, frontend, backend, database, deployment, and automation.
